

CEPAC TILE

Where Excellence in Quality & Service Unite!

Made in JAPAN

Cepac Tile continues, after 30 plus years, to bring the beauty of Japanese porcelain mosaics to the North American Market.

We pride ourselves on the fact that we are one of the only importers to source our entire collection exclusively from Japan!

The collections we have introduced to the market have ranged from traditional to modern, funky and whimsical. They have been created for the most part, by using traditional Japanese glazes that emulate those utilized by Ceramicist's hundreds of years ago. The mineral based "Yohen" glazes react in the kiln when fired at a high temperature over a longer period and the result is a deep, rich, varied glaze, with a moving or translucent finish. These glazes embrace the essence of Japanese pottery and ceramics!

We remain committed to providing innovative products along with excellent customer service from a small team of long serving employees, most of whom have been with us for 20-30 years!

A Story of Enduring Craft :

The History of DANTO-SHA, Japan's Oldest Tile Maker

Japan is a nation shaped by countless islands. According to Japanese mythology, Awaji Island is believed to be the first island created by the two deities who gave birth to the land of Japan. Encircled by three straits, Awaji has long been blessed with gifts from both sea and mountains—salt, sand, and clay of remarkable quality. Fine white sand (Suna) from the east and rich brown clay (Tan-do) from the west nurtured a distinctive ceramic heritage, including Minpei-yaki pottery and the celebrated Awaji roof tiles.

In 1885, DANTO-SHA was founded here, and today it stands as Japan's oldest existing tile manufacturer. By the early 1900s, the company began producing Japanese-style majolica tiles and established a unique production method—selecting soils and sands from across Japan, forming dense unglazed bodies, and finishing them with traditional glazes. The result: tiles of exceptional durability and frost resistance, suitable for interior and exterior applications alike. Despite significant damage from major earthquakes in 1995 and 2011, DANTO-SHA recovered with resilience and continues to carry its legacy forward.

Each tile begins with a naturally expressive unglazed base, composed from multiple clays and fired for a full day and night. Within the kiln, subtle chemical reactions create organic, one-of-a-kind variations in tone and texture. Often described as natural ceramic art, these tiles reflect more than 140 years of craftsmanship. Their depth, warmth, and authentic color movement cannot be replicated by modern inkjet printing.

× 淡陶社
DANTO-SHA

nation ★

In 2024, DANTO-SHA joined forces with CEPAC TILE, which for nearly four decades has introduced Japanese tile to the American market. After two years of thoughtful development, a new collection was realized.

Named AWAJI in honor of its birthplace, the collection is offered in four colors inspired by the island's native materials:

- **WHITE — Tan-en** Evoking the refined whiteness of Awaji's high-quality sea salt.
- **BLACK — Gen-tan** Inspired by the deep tones of traditional Awaji roof tiles.
- **BROWN — Tan-do** Drawn from the rich brown clay found in western Awaji.
- **BEIGE — Suna** Inspired by the natural sea sand of eastern Awaji.

No two tiles are ever the same. Yet their natural variation remains refined—quietly harmonizing with both interior and exterior spaces.

This is AWAJI. A collaboration shaped by place, history, and enduring craft.

Our Cepac custom order program provides access to unique products not stocked here in the United States, with low minimum quantity purchase requirements. Each of the series can be purchased in full box quantities with general lead times of approximately 45 to 90 days depending of the quantity required. We can also work with you to create random blends and custom patterns for most of the series as well. If you are interested in creating a random blend or custom pattern for a project or have any questions at all regarding our Custom Order Program, please do not hesitate to reach out via email to customercare@cepactile.com

CEPAC Recycling Program

Since opening our doors in 1989 Cepac Tile has been conscious and diligent about recycling and conserving. We feel that it is our duty to try and preserve as many resources as possible.

We incorporate recycling into our workdays with little things like re-using the paper we accumulate from unnecessary faxes received for memos. We also use China instead of paper plates and glass instead of plastic or styrofoam cups, in our lunch rooms.

We also recycle and conserve on a larger scale by partnering with manufactures that share our commitment to the environment. These manufactures use recycled ceramics to create the bisques for many of our product lines. Listed below you will find an alphabetical listing of our product lines that contain recycled content and the percentages they contain.

Recycle Bisques Percentage List

Disclaimer

Variations of shade are inherent characteristics of all kiln fired products.

To ensure satisfaction, please visually inspect all merchandise prior to installation, as use signifies acceptance.

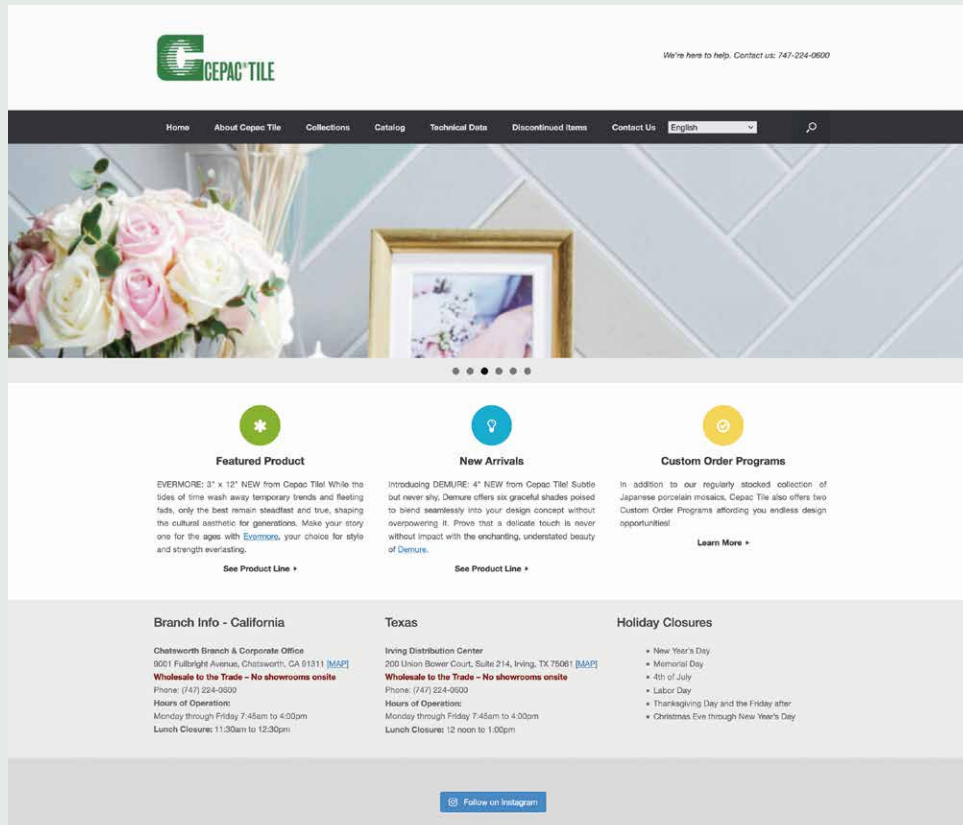

We will endeavor to resolve any issues that may arise with material purchased, prior to installation.

Please note that the darker colors in the Cepac Collection are also more susceptible to showing surface scratches and are not necessarily recommended for installations on horizontal surfaces.

While the majority of our products are frost proof and acid resistant porcelain, there are several items that do not meet these criteria and have been labeled accordingly.

In this regard we would stress the importance of referring to the footnotes throughout the catalog.

Due to the limitations of printing inks, colors shown in this catalog may differ from the actual product. Samples can be provided for verification of actual color.
